

AMD Summer Tech Mixer

AMD Dev Central Island, July 29th, 2007

Schmenge Writer: 50x15 Presentation.....	2
Jeff McGuire: AMD Careers	7
Mingan Munro: AMD Open Source Software.....	19
otakup0pe Neumann: Pleiades Consulting and LibSL	21
Eddy Stryker: Libsecondlife Project.....	24

[13:10] Dually Goalpost: Welcome everyone! We are streaming music, so listen in :D

- [13:10] Peter Newell: naturally.
- [13:10] Dually Goalpost: I want Tetris!
- [13:10] Gigs Taggart: heh well I was the only one for a long time
- [13:10] Adri Saarinen: Yes, we'll start with the presentations in a few minutes**
- [13:10] Rhiannon Chatnoir: did you guys get to go by the RFL sims
- [13:10] Peter Newell: did they actually call it Tetris?
- [13:10] Peter Newell spent lots of time at RFL
- [13:10] Adri Saarinen: rhi, they were AWESOME
- [13:10] Gigs Taggart: I don't remember
- [13:10] Peter Newell: much more than I should have.
- [13:10] Adri Saarinen: I took tons of pictures
- [13:10] Rhiannon Chatnoir: lol yes has that effect
- [13:11] Frans Charming: Hey
- [13:11] Adri Saarinen: Hi Frans! Welcome!
- [13:11] Rhiannon Chatnoir: yeah... people keep asking for the black riders
- [13:11] Rhiannon Chatnoir: hey there dutchy
- [13:11] Frans Charming: brining a newby i just met
- [13:11] Peter Newell: hiya Frans
- [13:11] Adri Saarinen: I took a pic of myself running away from the riders :D
- [13:11] Rhiannon Chatnoir: ahh cool
- [13:11] Peter Newell: heyhey otak
- [13:11] Rhiannon Chatnoir: i always subscribe to the adopt a newbie program
- [13:11] otakup0pe Neumann: Hello !
- [13:11] Adri Saarinen: Hi Otak :D
- [13:11] Rissa Maidstone: Hey there Otakup0pe
- [13:11] Haver Cole: Heyo Caroline & Otak!
- [13:11] Rhiannon Chatnoir: hello Carolinekerr
- [13:12] Dually Goalpost: w00t!
- [13:12] Haver Cole: welcome to AMD
- [13:12] Adri Saarinen applauds!
- [13:12] Frans Charming: =)
- [13:13] Haver Cole: Oo i love this song
- [13:13] Haver Cole: Heyoo YAzzara
- [13:13] Schmenge Writer: Let me know when to begin.

[13:14] Haver Cole: Peter are you IN a seat right now?
[13:14] Rhiannon Chatnoir: ahh Frans you are being called back
[13:14] Peter Newell: totally.
[13:14] Adri Saarinen applauds!
[13:14] Rhiannon Chatnoir: he is the only admin on for the RFL sims at the moment
[13:14] Haver Cole: whoohoooooo
[13:14] Frans Charming: it can wait a minute.
[13:14] Rissa Maidstone applauds
[13:14] Gigs Taggart: nope
[13:14] Haver Cole: ao off
[13:15] Adri Saarinen: Everyone direct your attention up here to the podium, Schmenge is going to give a presentation about AMD's connectivity outreach foundation
[13:15] Haver Cole: hahaha
[13:15] Peter Newell: jerk.
[13:15] Jeff McGuire: hey schmenge - welcome
[13:15] Frans Charming: carolinekerr,say hi in the open, they won't bite
[13:15] Rissa Maidstone smiles at Dually
[13:15] Dually Goalpost: :D
[13:15] Peter Newell settles in and listens.
[13:15] Rissa Maidstone chuckles.
[13:16] Rissa Maidstone: Welcome back Yazz
[13:16] Yazzara Robbiani: Hi!
[13:16] Rissa Maidstone: Come have a seat with us

Schmenge Writer: 50x15 Presentation

[13:16] Schmenge Writer: Hello. Sorry I'm experiencing some lag here. But I'm ready to begin in a second.
[13:16] Rissa Maidstone: in the peach outfit
[13:16] Haver Cole: ride the lag Schmenge!
[13:17] Rissa Maidstone: grin
[13:17] Schmenge Writer: :-)
[13:17] Dually Goalpost: haha
[13:17] Doubledown Tandino: dont fight the laaag
[13:17] Doubledown Tandino: let it become you
[13:17] Dually Goalpost: Be one with the lag
[13:17] Rissa Maidstone: a new mantra!
[13:17] Adri Saarinen: It's like zen
[13:17] Schmenge Writer: Lag is my friend? :)
[13:17] Adri Saarinen: But with SL servers
[13:17] Doubledown Tandino: Zen in the art of lag
[13:17] Rissa Maidstone: Lag is rush hour traffic
[13:17] Adri Saarinen: That's for sure

[13:18] Doubledown Tandino: rush hour traffic and looking out the window to see grey trees

[13:18] Frans Charming: brb

[13:18] Schmenge Writer: OK! Want to hear about 50x15?!

[13:18] Adri Saarinen: YAY!

[13:18] Adri Saarinen applauds!

[13:18] Dually Goalpost: Yaya!

[13:18] Jeff McGuire: absolutely

[13:19] otakup0pe Neumann: It sounds delightful.

[13:19] Schmenge Writer: 50x15 means "Connecting half the world's population to the Internet & computing devices by 2015.

[13:20] Schmenge Writer: It's about "Connecting the Digital Divide" or as we call it "Digital Inclusion" :)

[13:20] Schmenge Writer: It's about connecting students in emerging growth countries like Brazil & continents like Africa

[13:21] Schmenge Writer: If we don't global societies will be stacked out of favor

[13:22] Schmenge Writer: So, AMD was wise enough to recognize the benefits of "connecting" the world

[13:22] Haver Cole: /meeeno welcome have a seta:d

[13:22] Menno Ophelia: Merci

[13:22] Haver Cole: /er seat

[13:22] Schmenge Writer: Hence our Vision "A connected global population."

[13:22] Menno Ophelia: waiting for the rezz before i bump into someone

[13:23] Schmenge Writer: Some important things to know: we are a for profit venture & we recognize that we cannot do this alone.

[13:24] Schmenge Writer: As of this month, just 18% of the world has Internet access.

[13:24] Rhiannon Chatnoir: how is this in line with say others who are concerned with things like this.. like the United Nations and their ICT programs of bringing technology to the devloping world

[13:24] Schmenge Writer: So, we h ave our work cut out for us!

[13:24] Rhiannon Chatnoir was at one of the UN ICT forum days.. :)

[13:25] Schmenge Writer: But we are making an impact around the world.

[13:25] Schmenge Writer: Here's how!

[13:26] Schmenge Writer: 50x15 isn't just about dumping PCs in classrooms. It's a methodical, structured program with 3 main parts:

[13:26] Schmenge Writer: Learning Labs, a Partner program & in the near future a 50x15 charitable Foundation

[13:27] Schmenge Writer: How am I doing on time, friends?

[13:28] Haver Cole: preety good!

[13:28] Adri Saarinen: You're doing fine. :)

[13:28] Adri Saarinen: We'll do questions during Doubledown's next set

[13:28] Schmenge Writer: To conitinue: Learning Labs are classrooms and such that we deploy, using PCs w/ AMD processors, of course...

[13:29] Schmenge Writer: But we can only deploy them w/ companies that have expertise that far exceeds our own

[13:30] Schmenge Writer: By that I mean companies like "inveneo," which provides solar powered connectivity. But i digress :)

[13:30] Schmenge Writer: Here are some real world examples of 50x15 Learning Labs:

[13:31] Schmenge Writer: Uganda, S. Africa, the first of many under a partnership with NEPAD, defined on the screen behind me

[13:32] Schmenge Writer: The Learning Labs here are already paying dividends as three schools now have computers & Internet access

[13:33] Schmenge Writer: This has enabled a whole new set of citizens to experience a new world, so to speak...

[13:33] Schmenge Writer: The children are so much more interested in coming to school & that's "priceless"! :)

[13:34] Walk and Talk v1.22 whispers: Rhiannon Chatnoir took a copy of Walk and Talk Help

[13:34] Adri Saarinen applauds!

[13:34] otakup0pe Neumann claps

[13:35] Rhiannon Chatnoir: afk

[13:35] Schmenge Writer: But sometimes we help to connect more than just children...In Brazil we've connected a school where the students are e now teaching senior citizens!

[13:35] Jeff McGuire: cool

[13:36] Schmenge Writer: So far, more than 500 seniors have benefitted -- for some it has allowed them to expand their social contacts and learn new skills

[13:37] Schmenge Writer: One woman told 50x15 that the Oldnet Learning Lab has "Given her new hope!"

[13:37] Haver Cole: hahah @ old net

[13:37] Schmenge Writer: She now emails her grandchildren

[13:38] Schmenge Writer: We've deployed in China, too, partnering with Lenovo and Dawning to connect

[13:39] Schmenge Writer: literally millions of students in 18 Chinese provinces.

[13:40] Schmenge Writer: Our goal? to help bring China's rural education system up to par with those in other major cities.

[13:40] Schmenge Writer: One more thing about learning Labs:

[13:41] Schmenge Writer: We've catalogued each one -- we call them "Capsules" ... this is so ANYONE can take a capsule and build their own lab from our experiences,

[13:42] Peter Newell claps, "Very interesting."

[13:42] otakup0pe Neumann: This certainly is interestng.

[13:42] Schmenge Writer: which are 100% shared and open to anyone. Why? Because we know that in order to reach our goal

[13:42] Schmenge Writer: we can't do it alone. 50x15 is completely transparent.

[13:43] Schmenge Writer: Speaking of "not being able to do it alone" (my first SL segue :)

[13:43] Gigs Taggart: hehe

[13:44] Schmenge Writer: WE have established the 50x15 Partner Program

[13:44] Schmenge Writer: Much like SL, we want to build a community

[13:45] Adri Saarinen: Which sounds like it might be a good point to go into questions, is that ok, Schmenge? We have about fifteen minutes before Jeff's presentation on AMD Careers. :)

[13:45] Schmenge Writer: We call it our "ecosystem" -- that focuses on six key areas -- areas that help us build those Learning Labs I mentioned.

[13:46] Schmenge Writer: Sure!! I'll skip ahead a few slides -- I'm almost done so this is good timing

[13:46] Killian Klein: ao off

[13:47] Schmenge Writer: Our strategic partners

[13:47] otakup0pe Neumann: This is very interesting schmenge.

[13:47] Killian Klein: So am I at the cool kids table?

[13:47] Haver Cole: shh and ye syou are

[13:47] Schmenge Writer: And a foundation coming soon will allow individuals to donate

[13:47] Haver Cole: watch the presentation!

[13:48] Schmenge Writer: Finally ...

[13:48] Dually Goalpost: By the way, check out the 50x15 display area in our main exhibit hall, due east :D

[13:48] Schmenge Writer: Stop by our Video Display Room and Kiosk in the AMD Pavilion!!

[13:48] Schmenge Writer: Questions?

[13:48] Adri Saarinen applauds!

[13:49] Adri Saarinen: Thank you, Schmenge!

[13:49] Adri Saarinen: Rhiannon had a question earlier, let me pull it up

[13:49] Carbonel Tigereye applauds

[13:49] Schmenge Writer: Thanks, everyone! My pleasure!!

[13:49] Gigs Taggart: woo

[13:49] Schmenge Writer: This was very cool :)

[13:49] otakup0pe Neumann: i have one ;) what sort of donations are you looking for. learning seems a goal, is the group interested n partnering with content providers ?

[13:50] Dually Goalpost: Thank you very much, Schmenge!

[13:50] Jeff McGuire: have a seat michael

[13:50] Rissa Maidstone: Thank you, Schmenge :)

[13:50] Rissa Maidstone: Will there be a transcript available?

[13:50] Schmenge Writer: Yes. We are. Six parts of our partner program: Power, connectivity, Devices, Financing, CONTENT & Expertise.

[13:50] Jeff McGuire: Thanks Schmenge - I have a question. How does 50x15 tie in to OLPC?

[13:51] Rissa Maidstone smiles.

[13:51] Peter Newell: Also, what is the time goal for 100%? ^^

[13:51] Schmenge Writer: GREAT question! OLPC is one of many solutions 50x15 uses to provide Internet access is emerging growth markets.

[13:52] Adri Saarinen: Schmenge, here's a question from Rhiannon Chatnoir, "how is [50x15] in line with say others who are concerned with [connectivity] .. like the United Nations and their ICT programs of bringing technology to the devloping world"

[13:52] Christy Cosmos: yay! thx DD :)

[13:52] Schmenge Writer: 100%. Not sure, to be honest. We have a lot of work to do to connect half that and only 8 years left!

[13:52] Doubledown Tandino: hi Christy!

[13:53] Doubledown Tandino: wanna be my dj assistant today?

[13:53] Christy Cosmos: hiya slim! great set the other night!

[13:53] Slim Warrior: /hey:) ty

[13:53] Rhiannon Chatnoir: back.. thanks Adri

[13:53] Christy Cosmos: haha, and what exactly would that entail DD?? i'm not rooting around in your dusty old record boxes for any amount of glindens....lol!

[13:54] Schmenge Writer: Another good question! 50x15 is intimately involved in organizations such as the World Economic Forum and TED, which allow us to work closely with other top orgs ...

[13:55] Schmenge Writer: If you visit our website (shameless plug :) www.50x15.com, you'll see a Resource Links section with hundreds of like orgs listed.

[13:55] Adri Saarinen: <http://www.50x15.com> is the website :)

[13:55] Schmenge Writer: We all need to work together. The UN, Architecture for Humanity, etc.

[13:55] Rhiannon Chatnoir: yes

[13:55] Dually Goalpost: And if you forget, we have more information in the 50x15 display room, next door!

[13:56] Adri Saarinen applauds!

[13:56] Peter Newell claps, "Thank you Schmenge!"

[13:56] Adri Saarinen: Thank you Schmenge!

[13:56] Christy Cosmos: shameless plug! lol

[13:56] Schmenge Writer: Yes, thanks Dually!

[13:56] Haver Cole: woots

[13:56] Schmenge Writer: Again, my pleasure!! I'll fly away and watch the rest of the show!! :)

[13:57] InvisibleJet: All Go

[13:57] Haver Cole: /relogging on second

[13:57] Adri Saarinen: Hi Discorida :)

[13:58] Discordia Zenovka: Heya!

[13:59] Menno Ophelia: brb

[13:59] Killian Klein: ok

[13:59] Adri Saarinen: Don't forget, if you don't have your music controls turned on, click play

[13:59] Adri Saarinen: DJ Doubledown is spinning some great tunes, and coming up in about 20 minutes, we'll have electronica goddess Slim Warrior playing!

[14:00] Haver Cole: hoowheeee

[14:00] Discordia Zenovka: Oooh, nice.

[14:00] Jeff McGuire: danicing on the tables again! lol

[14:00] Haver Cole: haha who me?

[14:00] Haver Cole: im dancing withj the tetris!

[14:00] Adri Saarinen: But first, AMD recruiter Jeff McGuire is going to give a short presentation on AMD careers!

[14:01] Peter Newell: wb menno
[14:01] Menno Ophelia: thankies
[14:01] Menno Ophelia: i missed peter in my back
[14:01] Haver Cole: you were inside him
[14:01] Haver Cole: it was hot.
[14:01] Menno Ophelia: sst dont tell adri
[14:02] Adri Saarinen laughs
[14:02] otakup0pe Neumann: :o
[14:02] Peter Newell: hah :D
[14:02] Haver Cole says nossing
[14:02] Adri Saarinen: Ok, enough block stacking back there, let's turn it over to Jeff. :D
[14:02] Adri Saarinen applauds!
[14:02] Peter Newell claps and listens.

Jeff McGuire: AMD Careers

[14:03] Jeff McGuire: Welcome to the AMD Summer Tech mixer. I hope you have been enjoying yourself. Paul aka DuallyGoalpost, and the staff at Metaversatility have done an excellent job in developing this island and organizing this event.

[14:03] Dually Goalpost: w00t!

[14:03] Jeff McGuire: Today, I want to chat about AMD, what we believe in, where we came from, where we are going, career opportunities, benefits, our co-op program and then answer any questions that you might have.

[14:04] Jeff McGuire: To really understand where a company is going it helps to understand the leadership of that company. Hector Ruiz is our CEO and if you don't know him, I encourage you to do some research on him. Great organizations are led by great people and I think Hector is right up there among the best. Hector was born and raised in Piedras Negras, Mexico.

[14:04] Jeff McGuire: One of his neighbors was an American who noticed that he was exceptionally bright and helped him to attend school on the American side of the border.

[14:05] Jeff McGuire: To make a long story short, he took advantage of his opportunities and eventually earned a Ph.D in Quantum Electronics from Rice University. Hector has guided AMD to where we are by believing in the people who work here, believing in customer-centric innovation and equipping AMDers to deliver technology that is second to none in its innovation and value to customers.

[14:06] Jeff McGuire: AMD's culture is characterized by an indomitable will to succeed and prosper in one of the world's most challenging industries. At the heart of our unique and strong culture is the belief that people are the ultimate source of our competitive advantage.

[14:06] Jeff McGuire: By living these core values, each one of us helps to deliver on our promises to customers, maximize shareholder value and ensure our enduring success.

[14:07] Jeff McGuire: AMD was founded in 1969 with our headquarters in Sunnyvale, California. We have around 16,000 employees worldwide. 78% of our sales are international. Our revenue in 2005 was \$3.9B and in 2006 it was 5.6B

[14:08] Jeff McGuire: We have come a long way. Five years ago we had 5% of the CPU market. Today we are approaching 25%.

[14:08] Jeff McGuire: We have expanded our CPU offerings and have added key customers such as HP, IBM, Sun, Fujitsu and more recently Dell and Toshiba. About a year ago we combined forces with ATI which has positioned us with a strategic ability to compete on a full platform level like never before.

[14:09] Jeff McGuire: And our customers responded. AMD now ranks #8 in semiconductors worldwide.

[14:10] Jeff McGuire: That may be why Fortune ranked AMD #1 in Semiconductor Innovation, and #4 as the most admired company in the semiconductor industry, ahead of Intel.

[14:10] Jeff McGuire: How did our technology evolve to get us where we are today? In 1999 AMD introduced a long-term solution that customers could grow with.

[14:10] Jeff McGuire: In 2003 we permanently changed the IT landscape with the introduction of the AMD Opteron processor.

[14:11] Jeff McGuire: In 2005, we showed the industry how to make the transition from single-core to native dual-core.

[14:11] Jeff McGuire: In the next month or two, we believe the launch of 'Barcelona' will have an even greater impact. Beyond that we are looking towards a product named 'Fusion' which will merge the CPU and GPU functions.

[14:11] Jeff McGuire: AMD is a global processing powerhouse and we are looking for talent worldwide. If you look at the career kiosks in the lobby today you will see 15 Software development related opportunities. Most of these positions are mid to senior level.

[14:12] Jeff McGuire: However, we have a very aggressive Co-op, Intern, and new college graduate program and we are constantly on the lookout for talent at all levels.

[14:12] Jeff McGuire: We are looking for skills in Sales, Marketing, Finance, Legal, Manufacturing, R&D, and Design to name a few.

[14:12] Haver Cole: goo interns!

[14:12] otakup0pe Neumann: hehe.

[14:12] Jeff McGuire: Yeah. Go Interns!

[14:12] Jeff McGuire: Let's talk about that

[14:13] Jeff McGuire: .AMD has an aggressive Co-op / Intern program with medical and dental benefits, paid holidays, relocation, and fee reimbursement.

[14:14] Jeff McGuire: What is a Co-op versus an Intern? A Co-op is a student that participates in a formal program through their university's career center. They complete a full time assignment during a school term and usually receive course credit. They commit to working a minimum of two tours on an alternating basis.

[14:14] Jeff McGuire: An intern is a student that does not use their university's career center, usually do not receive course credit and usually work during the summer semester.

[14:14] **Jeff McGuire:** There are some minimum requirements that must be met. Undergrads need to maintain a 3.0, while grad students must carry a 3.5. International students must be at the MS or PhD level. Students must have completed their sophomore year and have at least one semester remaining after completion of the Co-op assignment. The student must be enrolled in a program that is relevant to the work assignment and must work full time during the entire period.

[14:15] **Jeff McGuire:** pretty standard stuff

[14:15] **Jeff McGuire:** Let's chat about benefits for full time, regular employees.

[14:16] **Jeff McGuire:** AMD offers a world class benefits package with comprehensive medical, dental, vision, accidental death and dismemberment, employee assistance program, on-site fitness center, a health care reimbursement account and sick leave.

[14:16] **Jeff McGuire:** . These plans are very competitive with top tier companies in the region in which the employee works.

[14:16] **Jeff McGuire:** Vacation: In the US, the employee receives 3 weeks of paid vacation after one year of service. After 4 years of service, the employee will accumulate an additional day of vacation for each year and will max out at 4 weeks after 8 years of service.

[14:17] **Jeff McGuire:** All employees also receive 11 paid holidays per year. In addition, exempt employees will receive a 4 week paid sabbatical after the first 5 years of service.

[14:17] **Jeff McGuire:** Financial: All employees are eligible for a 401(k) plan that the company will match 50% on the first 6% that is invested.

[14:17] **Jeff McGuire:** There is also an employee stock purchase plan where AMD stock can be bought at a 15% discount.

[14:18] **Jeff McGuire:** In addition there is a profit sharing plan that pays out quarterly along with a supplemental life insurance plan.

[14:18] Peter Newell: /hiya Sindee

[14:18] **Jeff McGuire:** Education: AMD values education and therefore will reimburse 100% of tuition and fees for eligible employees up to a maximum of \$7500 / year.

[14:18] Sindee Luke: Hi Sorry to intrude

[14:18] Peter Newell: /not intruding at all, have a seat :)

[14:18] **Jeff McGuire:** Undergrads must earn a C or better, while grads must earn a B or better for each class that is reimbursed. In addition, Co-ops and Interns are eligible for fee reimbursement.

[14:19] Dually Goalpost: Welcome Sindee!

[14:19] Adri Saarinen: / Come have a seat, Sindee, we have an AMD careers presentation going on right now, and Slim Warrior coming up in a few moments

[14:19] Haver Cole: /welcome sindee!

[14:19] **Jeff McGuire:** any questions so far?

[14:19] Sindee Luke: ok good that is what I was looking for thanks :)

[14:19] Peter Newell: Are open positions listed on the dev central website?

[14:20] Dually Goalpost: www.amd.com/careers/

[14:20] Peter Newell looks at slide and retracts question :p

[14:20] Jeff McGuire: There are 15 openings listed at the kiosk over there

[14:20] Haver Cole: hehehe petah

[14:20] Carbonel Tigereye: *Jeff, I know many technically savvy students who recently graduated. They weren't trained in computer science, but know their way around new media... Would there be a place for them in this program?*

[14:20] Haver Cole: hihhi Peet welcome to AMD

[14:20] Haver Cole: have a seat :d

[14:20] Schmenge Writer: *Hi, Jeff. Is AMD hiring FTEs currently?*

[14:20] Jeff McGuire: Carbonel - there is a place for everybody at AMD

[14:21] Carbonel Tigereye smiles.

[14:21] Peet Peterman: hey Haver

[14:21] Peet Peterman: hello everybody

[14:21] Jeff McGuire: what do you mean by FTE?

[14:21] Slim Warrior: /heya Peet

[14:21] Rissa Maidstone: fulltime employee

[14:21] Peet Peterman: hey Slim:)

[14:21] Rissa Maidstone: I'd assume

[14:21] Schmenge Writer: Full-Time Employees as opposed to contractors...

[14:21] Adri Saarinen: Hi Peet, Jeff is taking queestions about AMD careers, and we have Slim going on in just a few minutes

[14:21] Jeff McGuire: Yes

[14:22] Peet Peterman: hey Adri

[14:22] Jeff McGuire: As of last week we had 800 openings worldwide

[14:22] Haver Cole: welcome back Striker

[14:23] Adri Saarinen: Are there any more questions for Jeff?

[14:23] Schmenge Writer: Thanks, Jeff. I love working at AMD. Great company & only going to get better!

[14:23] Menno Ophelia: woohoo slim

[14:23] Jeff McGuire: I hope I have met your expectations, and would like to meet with any of you who are interested in discussing career opportunities at AMD. As we like to say – AMD is the smarter choice. Please visit our career site at www.amd.com/careers or email your resume to Jeffrey.worth@amd.com Thank you for your time.

[14:23] Slim Warrior: /lol

[14:23] Peter Newell claps

[14:23] Peter Newell: Thanks Jeff!

[14:24] Carbonel Tigereye claps

[14:24] Adri Saarinen applauds!

[14:24] Adri Saarinen applauds!

[14:24] Rissa Maidstone applauds

[14:24] Carbonel Tigereye: Thanks, Jeff.

[14:24] Adri Saarinen: Thank you Jeff!

[14:24] Discordia Zenovka: /applaud

[14:24] Haver Cole: awesome

[14:24] Dually Goalpost W00ts!

[14:24] Miichael Scofield: Claps

[14:25] Adri Saarinen: We love Slim!
[14:25] Sindee Luke: awwwwww
[14:26] Christy Cosmos: /passes a strepsil to slim.....honey flavour hun....
[14:26] Menno Ophelia: poor slim
[14:26] Adri Saarinen: YAYAYAYAY
[14:26] Adri Saarinen applauds!
[14:27] Sindee Luke: woohooo!
[14:27] Christy Cosmos: wooooo
[14:27] Gigs Taggart: woo
[14:28] Adri Saarinen: yay!
[14:28] Christy Cosmos: woooooooooo
[14:28] Doubledown Tandino: ok you're now listening to slimmie
[14:28] Haver Cole: wheeee
[14:28] Peter Newell cheers!
[14:28] Haver Cole: thank you Doubledown
[14:28] Menno Ophelia: woohoo slim
[14:28] Slim Warrior: /hehee
[14:28] Slim Warrior: Welcome everyone, what a great meeting!
[14:28] Peet Peterman: /sounds great Slim:)
[14:29] Doubledown Tandino: the kiddie table :O)
[14:29] Adri Saarinen: / Everyone give it up for Slim, who's streaming to us live from England, even though she has the flu!
[14:29] Sindee Luke: applause!
[14:30] Shad Raffke: hey :)
[14:30] Christy Cosmos: woooo
[14:30] Adri Saarinen: If anyone wants to dance and doesn't have anims, let me know!
[14:30] Haver Cole: Or me :D
[14:31] Slim Warrior: yes I think you all need to dance now :)
[14:31] Peet Peterman: /woooooot great applause
[14:31] Slim Warrior: All the music you hear from me for the next 45 mins or so is my own original music
[14:31] Peter Newell <3s Slimmie!
[14:32] Menno Ophelia: woohoo slim
[14:32] Christy Cosmos: cool slimmie
[14:32] Doubledown Tandino: christy, where you at?
[14:32] Doubledown Tandino: come sit at the kiddie table
[14:32] Adri Saarinen: Slimmie, do you have all of this stuff on a website yet? :D
[14:32] Slim Warrior: / nooo
[14:32] Christy Cosmos: /get up and shake it DD! lol
[14:32] Slim Warrior: This one actually yes,
[14:33] Slim Warrior: but most of what I will play is not up on any site
[14:33] Rissa Maidstone: dance ball in my head if any need, just left click on it
[14:33] Doubledown Tandino: lol, nah.. this is when the dj hits the buffet table
[14:33] Slim Warrior: so ya got some exclusives today;))
[14:33] Haver Cole: haha nice
[14:33] Haver Cole is starving

[14:33] Doubledown Tandino: i know how to work these events :O) DJ time for little hotdogs in bread.. and shrimp cocktail

[14:33] Christy Cosmos: lol.....did you eat all the crayons again DD?

[14:34] Doubledown Tandino: again? never ate the crayons

[14:34] Christy Cosmos: is this the colouring-in table?

[14:34] Rissa Maidstone: sorry!

[14:34] Doubledown Tandino: id eat a marker before a crayon

[14:34] Slim Warrior: if it was a strawbeery crayon I might eat that

[14:34] Christy Cosmos: gimme a big fat magic marker anyday! lmao

[14:34] Haver Cole: I think you are supposed to sniff the markers?

[14:34] Haver Cole: and eat glue?

[14:34] Sindee Luke: I'm a chalk eater myself

[14:34] Slim Warrior: haha

[14:35] Adri Saarinen: yay, I love this song!

[14:35] Christy Cosmos: eat the crayon and then wash it down with a marker chaser...mmmm

[14:35] Doubledown Tandino: wait.. we're supposed to be professionals here... we dont eat crayons.... we eat "elite writer ballpoint executive fountain pens"

[14:35] Haver Cole: we are so multicultural here!

[14:35] Adri Saarinen: Yes! Otak dancing on the table.

[14:35] otakup0pe Neumann: What sort of geographic representation do we have here ?

[14:35] Peter Newell: lots of TX

[14:36] Dually Goalpost: Lots of Texans

[14:36] Dually Goalpost: haha

[14:36] Christy Cosmos: yeah, we're showing our working-class backgrounds DD.....changes to devouring my Mont Blanc fountain pen...lol

[14:36] Haver Cole: Chicago!

[14:36] Dually Goalpost: jinx

[14:36] Shad Raffke: Hi Christy :)

[14:36] Gigs Taggart: VA

[14:36] Doubledown Tandino: Im in Baltimore MD

[14:36] Peter Newell: :D

[14:36] Slim Warrior: London UK

[14:36] Discordia Zenovka: Amarillo, Texas. :)

[14:36] Doubledown Tandino: Haver, im assuming youre goin to SLCC?

[14:36] Christy Cosmos: heya shad! what are you eating? lol

[14:36] Slim Warrior: crayons?

[14:36] Doubledown Tandino: <--- Key West Floirda.. in 2 months

[14:36] Dually Goalpost: BTW, although our HQ is in the Bay Area, our largest campus is in Austin!

[14:36] Killian Klein: Alaska

[14:36] Peter Newell: our netherlands contengent left!

[14:36] otakup0pe Neumann: i'm from halifax but in montréal

[14:36] Adri Saarinen: Haver's speaking on a panel at SLCC. Peter and I are going to represent, too. :D

[14:36] Doubledown Tandino: they have second life in alaska?

[14:36] Sindee Luke: Pacific NW
[14:36] Killian Klein: haha
[14:36] Haver Cole: Menno is a dutchie
[14:37] Christy Cosmos: well, i'm eeeenglish but live in the netherlands....
[14:37] Haver Cole: Oo burnnnnn
[14:37] Doubledown Tandino: i was supposed to speak on a panel....
[14:37] Christy Cosmos: hoi menno! hoe gaat het?
[14:37] Shad Raffke: lol everything, dont tell anyone though
[14:37] Menno Ophelia: Hey jezz
[14:37] Christy Cosmos: lol shad
[14:37] Killian Klein: I was wondering the same about florida
[14:37] Menno Ophelia: Hey christy
[14:37] Shad Raffke: <--binge eater
[14:37] Shad Raffke: haha
[14:37] Rissa Maidstone: Hey Michael :)
[14:37] Killian Klein: I thought only people went there to die
[14:37] Christy Cosmos: cmon u 2...get up n boogeh.....
[14:37] Killian Klein: lol
[14:37] Jezebella Electricteeth: Hello! Just rezzing.
[14:37] OWENIMATIONS DUO DANCER: OWENIMATIONS DUO DANCER v3.4 -
- type /99help for instructions
[14:37] Doubledown Tandino: florida loses its Second Life every day at 4pm during the
TStorms
[14:38] Haver Cole: Hi Jez
[14:38] Haver Cole: !
[14:38] APPLAUSE: A Hearty round of applause bursts from the crowd
[14:38] Jezebella Electricteeth: Hey Haver!
[14:38] Miichael Scofield: hi rissa
[14:38] Menno Ophelia: Jezz is gonna swing her nice tail
[14:38] Haver Cole: woohooo
[14:38] Peet Peterman: /great show Slim
[14:38] Haver Cole: always fun to watch
[14:38] Rhiannon Chatnoir will be at SLCC, is helping organize the non profit panels
and doing the program
[14:38] Jezebella Electricteeth giggles.
[14:38] otakup0pe Neumann: I need to organize my SLCC panel tonight :o
[14:39] Jezebella Electricteeth: Soon as I rez.
[14:39] Slim Warrior: Its going to be such fun to go to SLCC
[14:39] Jezebella Electricteeth: tail flicking aplenty.
[14:39] Jeff McGuire: /dance
[14:39] Doubledown Tandino: I think any SLCC panel NEEDS a baking soda volcano
presentation
[14:39] Adri Saarinen: HI Troy!!
[14:39] Miichael Scofield: / dance
[14:39] Sindee Luke: woohooo!!!
[14:39] Troy Vogel: heyaz

[14:40] Dually Goalpost: Troybie
[14:40] Haver Cole: YAAy troy!
[14:40] Sindee Luke: Skye do you wanna dance on my Hud?
[14:40] Troy Vogel: hetaz everyones
[14:40] Haver Cole: Oo looking very cali casual
[14:40] Haver Cole: hot
[14:40] Christy Cosmos: hetaz
[14:40] Peter Newell shouts: /JueL and Chel, over here!
[14:40] Peter Newell shouts: To your right!
[14:41] Slim Warrior: Hey jeff:0
[14:41] JueL Resistance: LATTE PLEASE?
[14:42] otakup0pe Neumann: Sup Eddy.
[14:42] JueL Resistance: 5Froogles for one latte eh?
[14:42] Eddy Stryker: hello
[14:42] Peter Newell hands Juel a Latte
[14:42] Rissa Maidstone: Hey Eddy good to see you again
[14:42] Christy Cosmos: CHOOOON
[14:42] JueL Resistance: DOUBLE!
[14:42] Slim Warrior: This track is called Seven Pillars
[14:42] JueL Resistance: hi Jeff
[14:42] Doubledown Tandino: yeah.. i was just IMing SLimm telling her how CHOON this was!!
[14:42] JueL Resistance: WOOOT SLIM
[14:42] Slim Warrior: I wrote this about a year or so ago witha good friend of mine
[14:42] Doubledown Tandino: HEEEEY JUEL!!
[14:42] Doubledown Tandino: welcome
[14:42] Christy Cosmos: nice geetars slimmie!
[14:42] Slim Warrior: he is the guitarist
[14:42] JueL Resistance: LOL DD Wooo
[14:42] Chel Pixie: DD!
[14:42] Rissa Maidstone: dance ball in my head, left click on it to dance, if you wish
[14:43] Doubledown Tandino: can a tune be CHOON? like an adjective?
[14:43] Doubledown Tandino: this tune is soo choon!
[14:43] Christy Cosmos: of course it can DD
[14:43] Shad Raffke: i dont have objections ^^
[14:43] Jezebella Electricteeth: Wooo I think everyone finally rezzed! Wicked music.
[14:44] Christy Cosmos: though i like to use the word 'CHOOON' as an expression of personal approval.....lol
[14:44] Doubledown Tandino: objections? arent those if, and or but?
[14:44] Peter Newell claps!
[14:44] Troy Vogel: well I know this sux but I must go
[14:44] JueL Resistance: WOOOT
[14:44] Haver Cole: chooon
[14:44] JueL Resistance: Click on my back to dance
[14:44] Troy Vogel: gotta go to early dinner in RL
[14:44] Christy Cosmos: lol

[14:44] Dually Goalpost: aww
[14:44] Adri Saarinen: Byyyee Troy! HOpe to see you soon :D
[14:44] Slim Warrior: WOOt JueL!
[14:44] JueL Resistance: all this white makes my eyes shiver
[14:45] Peter Newell: This is all original music by slim warrior everyone, glad you could join us!
[14:45] Doubledown Tandino: choon tune
[14:45] JueL Resistance: FROOGLE WOMAN!
[14:45] Sindee Luke: applause
[14:45] JueL Resistance: SMOOCH
[14:45] Dually Goalpost: Thanks for stopping by Troybie
[14:45] Slim Warrior: I match the floor and tables
[14:45] Slim Warrior: hehehe
[14:45] Troy Vogel: thanks for the invites
[14:45] Troy Vogel: byez for now
[14:45] JueL Resistance: lol
[14:45] Troy Vogel: send people to my store people
[14:45] Troy Vogel: lol
[14:45] JueL Resistance: Nice TUNAGE
[14:45] Troy Vogel: I need money
[14:45] Christy Cosmos: considers changing hair colour temporarily.....i whited out! lol
[14:45] Troy Vogel: *kiddingt*
[14:45] Haver Cole: ♥ troy!
[14:45] Doubledown Tandino: set your sun to "off"?
[14:45] Troy Vogel: :-)
[14:45] Troy Vogel: byez
[14:45] Adri Saarinen: Troy makes furniture!
[14:45] Troy Vogel: loves
[14:45] Adri Saarinen: And art!
[14:45] Jezebella Electricteeth: White is always good! ;)
[14:45] Christy Cosmos: oh yeah, good idee DD
[14:45] Dually Goalpost: And FLW mansions!
[14:45] Slim Warrior: For those of you who don't know, All the music I will play for you tonight is what I write mix sing and produce myself
[14:45] JueL Resistance: i say that if i'm really 'out of it dd" turn the sun off
[14:45] JueL Resistance: LOL
[14:45] JueL Resistance: PUT TH ELIGHT OUT
[14:45] Christy Cosmos: ooh, midnight looks good here...
[14:45] JueL Resistance: turn the day time offffffff
[14:46] Slim Warrior: and luckily for you I cannot talk today!
[14:46] JueL Resistance: yeah it does
[14:46] Doubledown Tandino: itd be cool to have a set your sun to blacklight
[14:46] JueL Resistance: brb more java
[14:46] JueL Resistance: oh HEL* yeah DD
[14:46] Dually Goalpost: Midnight coming up
[14:46] DMC Zsigmond: back

[14:46] Doubledown Tandino: or set your sun to discomode... entire sun turning into a rotating disco ball

[14:46] Sindee Luke: But I miss your echo Slim

[14:46] Walk and Talk v1.22 whispers: Jeff McGuire took a copy of Walk and Talk Help

[14:46] Slim Warrior: /hehe

[14:46] Doubledown Tandino: why cant there be sun client scripts?

[14:46] Slim Warrior: /and my little voice box that makes me sound like and alien

[14:46] Slim Warrior: hehehe

[14:47] Doubledown Tandino: uh oh, someone didnt pay their electricity bill

[14:47] DMC Zsigmond: Duallly, are we still having the Open Source speakers at 3pm

[14:47] DMC Zsigmond: ?

[14:47] Sindee Luke: LOL yep

[14:47] Haver Cole: duuudeeee

[14:47] Adri Saarinen: Yes, the open source and LibSL presentations will start at 3

[14:47] Doubledown Tandino: 3:00pm - Open Source Presentations & Panel feat. Marc Miller, John Hurliman, Jonathan Freedman

[14:47] DMC Zsigmond: Great :)

[14:47] Slim Warrior: 'shameless plug'.. my website is <http://www.myspace.com/slimmie..> stop by and leave a comment:)

[14:47] JueL Resistance: u wanna dance sessssy click my back

[14:48] Haver Cole: haha niiece

[14:48] JueL Resistance: omg first time in 24 hours i've been out of the RFL sims

[14:48] Haver Cole: welcome to the LIGHT

[14:48] Menno Ophelia: haha

[14:48] JueL Resistance: LOL

[14:48] Slim Warrior: hehe RFL was incredible

[14:48] JueL Resistance: Peter thanks for your FINE ARSE DIrections :)

[14:48] Chel Pixie: me too JueL

[14:48] Haver Cole hands you coffee and water and some fried chicken?

[14:48] Peter Newell: hehe

[14:49] Peter Newell: I do my best.

[14:49] JueL Resistance: wow

[14:49] Rhiannon Chatnoir: me too Juel

[14:49] Multi Gadget v1.52.0 by Timeless Prototype

[14:49] JueL Resistance: we made it crossin over

[14:49] JueL Resistance: WOOT TO ALL O FYOU that were THERE

[14:49] Rhiannon Chatnoir: I have been in the RFL sims all week

[14:49] JueL Resistance: WOooOOOOooOOT

[14:49] Chel Pixie: there weren't any parties anymore

[14:49] JueL Resistance: WOOT to all who supported

[14:49] Slim Warrior: I put in a bid for the most amazing house

[14:49] Rhiannon Chatnoir: cool

[14:49] Slim Warrior: I think I looked at everything on all the sims

[14:50] Haver Cole: the barnes one?

[14:50] Adri Saarinen: I took sooooo many pictures

[14:50] Slim Warrior: there was a huge hacienda one

[14:50] Rhiannon Chatnoir: we offered that they could auction off our sim.... guess they were rented though

[14:50] Slim Warrior: totally outrageously gorgeous

[14:50] Adri Saarinen: I know LL donated temporary sims last year. Not sure about this year.

[14:51] Rhiannon Chatnoir: yeah... oh well next day or so we are going to be documenting it with pics and maybe shooting some machinima at the Start sim

[14:51] Haver Cole: HEyooo Vioolet!

[14:51] JueL Resistance: oooo

[14:51] otakup0pe Neumann: hey violet.

[14:51] OWENIMATIONS DUO DANCER: OWENIMATIONS DUO DANCER v3.4 -
- type /99help for instructions

[14:51] Rhiannon Chatnoir: people keep IMing me asking if they can get blackriders

[14:51] Violet Hazlitt: Hi....?

[14:51] Rhiannon Chatnoir: :P

[14:51] Haver Cole: welcome to thhe AMD sim!

[14:51] Adri Saarinen: Hullo Violet

[14:52] Violet Hazlitt: why are you dancing on the table?

[14:52] Violet Hazlitt: hi, thanks

[14:52] otakup0pe Neumann: :s

[14:52] Adri Saarinen coughs

[14:53] Haver Cole gets my ones

[14:53] Chel Pixie: Juel where did you get that dance ball?

[14:54] Chel Pixie: I'm all over the effin place

[14:54] Doubledown Tandino: HIIII Chel!!

[14:54] Doubledown Tandino: sorry i didnt see ya come in

[14:54] Chel Pixie: Hi DD

[14:54] Chel Pixie: I said hi

[14:54] Chel Pixie: :P

[14:54] Doubledown Tandino: how'd the rest of relayfor life go?

[14:54] Peter Newell: Hiya Troy!

[14:54] Slim Warrior: ok you all get a choice .. I canplay one more dancey trackm or a smoochy slow one;))

[14:54] Doubledown Tandino: yeah, im always lookin at the wrong window at the wrong time

[14:54] Adri Saarinen: Hi Troy!

[14:54] Doubledown Tandino: dancey and smoochy

[14:54] Slim Warrior: ha!

[14:54] Peter Newell: you humans and your smoochy slow ones

[14:55] Troy McLuhan: Hehe

[14:55] Doubledown Tandino: dancy choonish smoochy

[14:55] otakup0pe Neumann: Troy ! hey what's hapening

[14:55] Rhiannon Chatnoir: they made their goal... and at this point there is people still wandering and doing laps casually

[14:55] Discordia Zenovka: Smoochy!

[14:55] Adri Saarinen sighs. "Tetris blocks are no fun with smoochy slow ones."

[14:55] Violet Hazlitt: oh, now I see why you were dancing on the table
[14:55] Doubledown Tandino: Lip dancing music
[14:55] Slim Warrior: lol
[14:55] Rhiannon Chatnoir: lip eh
[14:56] Chel Pixie: I gotta have some lips to dance with first :P
[14:56] Christy Cosmos: what the jiggery pokery is 'lip dancing' ??
[14:56] Slim Warrior: ok you get slow
[14:56] Slim Warrior: ish
[14:56] Chel Pixie: lol
[14:56] Menno Ophelia: woohooo slim
[14:56] JueL Resistance: WooooooooooooooooOOooot
[14:57] Slim Warrior: this is from my new album
[14:57] Slim Warrior: :)
[14:57] Chel Pixie: Dd the rest of Relay as you may have heard was a blast.
[14:57] Doubledown Tandino: no idea what lip dancing is... but there's the SL ballet, you could ask them
[14:57] Frans Charming: got busier.
[14:57] Rhiannon Chatnoir: i didnt get a chance to
[14:57] Rhiannon Chatnoir: lol
[14:58] Rhiannon Chatnoir: we talkeda bout all of us organizers/creating it doing one lap before it poofs
[14:58] Doubledown Tandino: ok i gotta go backstage
[14:58] Rhiannon Chatnoir: we should do that late tonight
[14:58] Rhiannon Chatnoir: lol
[14:59] Adri Saarinen: I saw there was a PJs lap. :D
[14:59] Shad Raffke: bye Doubledown...bye all. take care.
[14:59] Slim Warrior: Thankyou all so much for listening to some of my music:)
[14:59] Peter Newell: Thanks for coming Shad
[14:59] Adri Saarinen applauds!
[14:59] Menno Ophelia: You rock SLim!!
[14:59] Haver Cole: Thank you doubledown!!
[14:59] Adri Saarinen: YAYAY Thanks Slim!
[14:59] Christy Cosmos: gotta scoot...bye all :) nice choons DD and slim!
[14:59] Peter Newell cheers!
[14:59] Chel Pixie: woot Slimmie!
[14:59] JueL Resistance: WooooOoot SLIM!
[14:59] Menno Ophelia: woohoo
[14:59] JueL Resistance: WOMAN! :)
[14:59] Haver Cole: WOOT SLIMMMY!
[14:59] Haver Cole: ♥
[14:59] Sindee Luke: YAY SLim we love you!
[14:59] Dually Goalpost: Bravo! Bravissimo!
[14:59] Slim Warrior: and Ty Adri for inviting me:)
[14:59] Skye Tracer: you're welcom Slim
[15:00] Haver Cole: ao on
[15:01] Haver Cole: HAYYVErrrr DT :P

[15:01] Rissa Maidstone: HI there Dreamy
[15:01] Dreamy Rau: Hello
[15:02] otakup0pe Neumann: sounds good.
[15:03] Adri Saarinen: Each presenter will be giving a ten minute presentation, then we'll open the floor for questions :)
[15:03] Chel Pixie: <3 your hair slimmie
[15:03] Adri Saarinen: Everyone please turn your attention to Mingan/Marc and we'll get started!
[15:03] Slim Warrior: thanks, am trying not to poke myslef in the chest too much with it

Mingan Munro: AMD Open Source Software

[15:03] Mingan Munro: Hello. My name is Mingan Munro, or known in my FL as Marc Miller, Open Source Relations Manager for AMD.

[15:04] Haver Cole: ao off

[15:04] Mingan Munro: I would like to give you a general idea of why and how AMD is involved in open source software.

[15:05] Mingan Munro: Unlike our competitors, we do not sell licenses to our software, so we have nothing to gain from hiding the methods used to get the most out of our processors.

[15:05] Mingan Munro: Open standards create a compatible yet competitive atmosphere that benefits our customers, and as part of AMD's commitment to "Customer-Centric Innovation" we support open standards because we want to encourage combinations of technology that allow our customers to be innovative too.

[15:05] Mingan Munro: It makes sense for us to continue our investments in open source given our interest in industries that have openly embraced open source software in the last few years:

[15:05] Mingan Munro: Finance & investments,

[15:06] Mingan Munro: online retailers such as Amazon.com,

[15:06] Mingan Munro: and the communications industry which now encompasses data processing, telephone call routing & billing

software, and even video services like television and Internet-based broadcasting.

[15:06] Mingan Munro: So just what are AMD's investments in open source?

[15:06] JueL Resistance: WOOOOT DOUBLE

[15:06] Mingan Munro: I'd like to start off by highlighting some of our most important ongoing activities with the open source community to give you an idea of how AMD is involved.

[15:06] Mingan Munro: We've gotten the message loud and clear that software developers want a compiler that is as optimized as the Intel ICC compiler, but they don't want to have to favor one brand of processor over another.

[15:06] JueL Resistance: SLIM and DD YOU ROCK

[15:07] Mingan Munro: Our solution was to hire a team of engineers to enhance an already well-known high-performance compiler

(Portland Group - <http://www.pgroup.com/>) and put them on-site.

[15:07] Mingan Munro: Since the compiler isn't ours, PGI makes sure we don't do something that would impair Intel processors

while at the same time implementing the very best in AMD-optimized compiler output.

[15:07] Mingan Munro: Unfortunately PGI is a closed-source product, and thus can't be used for certain types of Linux software.

[15:07] otakup0pe Neumann: :(

[15:07] Mingan Munro: We respect that the Portland Group has intellectual property they do not wish to expose, and acknowledge that GCC is the compiler of choice for Linux.

[15:07] Mingan Munro: In support of GCC, we have a team of 4 engineers that implement support for the newest processor

features in a completely GPL tool chain, working alongside other open source leaders such as Novell and

Red Hat.

[15:08] Mingan Munro: Though GCC does not benefit from the Portland Group's intellectual property in terms of performance, we

do invest a lot in making sure that GCC's performance does not lag significantly behind the other compilers available.

*****Editorial correction 8/2/2007:**

~~**[15:08] Mingan Munro: Our team of kernel engineers is spread among the AMD campus in Austin TX, Novell's SUSE campus in Nuremberg, Germany, and Red Hat's campus in Raleigh, NC.**~~

Mingan Munro: Our team of kernel engineers is spread among the AMD Operating System Research Center based in Dresden, Germany, Novell's SUSE campus in Nuremberg, Germany, and Red Hat's campus in Raleigh, NC.

*****End correction**

[15:08] Mingan Munro: This is to ensure that AMD features are implemented properly with major Linux vendors' kernels yet are also implemented upstream on kernel.org.

[15:08] JueL Resistance: woooOooOT

[15:08] Mingan Munro: When we designed hardware virtualization for our Next Generation AMD Opteron product, we knew we would

need the support of an open source project to do so, in addition to alliances with commercial

virtualization products like VMWare.

[15:08] Mingan Munro: We have a team of engineers devoted to the Xen project that are spread all over the world. I am one of the founders of the Linux Foundation Desktop Architects project, which unites developers focused on primarily client-focused (workstation, kiosk, desktop, notebook, PDA, etc.) projects to synchronize goals, exchange ideas about solutions, and understand what aspects still need help.

[15:09] otakup0pe Neumann: Xen 4tw.

[15:09] Mingan Munro: This has been remarkably successful, giving birth to the Portland Project to eliminate the war between the GNOME and KDE projects, greatly improving printer support, and broadening the scope of the LSB specification used to eliminate the need to recompile or rewrite the project for each implementation of Linux.

[15:09] Mingan Munro: I'm also on the Linux Foundation's Board of Directors, guiding the future of the LF and making sure that Linus Torvalds continues to receive paychecks.

[15:09] Mingan Munro: Finally, since I know this is relevant to graphics-focused developers like those who build software for Second Life, at Red Hat Summit in San Diego this year, AMD announced that it was working to finally fix things between the Linux community and our graphics products.

[15:10] Mingan Munro: We remain committed to that goal.

[15:10] Adri Saarinen applauds!

[15:10] Mingan Munro: We can't elaborate at this stage of the process, but more announcements to that regard are coming soon.

[15:10] Mingan Munro: I hope that has been enlightening for everyone. That concludes my prepared material.

[15:11] Adri Saarinen applauds!

[15:11] Haver Cole: yaaay

[15:11] Adri Saarinen: Thank you Mingan-- let's hold questions until after otak and Eddy have spoken.

[15:11] DMC Zsigmond: Thanks Mingan ;)

[15:11] Rissa Maidstone applauds.

[15:11] Peter Newell claps

[15:11] Adri Saarinen applauds!

[15:11] Eddy Stryker applauds

[15:12] otakup0pe Neumann waves

[15:12] Violet Hazlitt applaudes

[15:12] Dually Goalpost applauds too

otakup0pe Neumann: Pleiades Consulting and LibSL

[15:12] otakup0pe Neumann: The current iteration of the internet has its roots in relatively open research, and is currently based on open standards. This allows different systems to remain compatible despite the fact they may be written in different languages in different parts of the world.

[15:12] otakup0pe Neumann: In many cases companies choose to develop proprietary solutions based upon these standards, and that is their prerogative. Others choose to sponsor open source projects, and in yet other cases developers choose to work simply out of passion.

[15:13] otakup0pe Neumann: I work for an educational technology company, Pleiades Consulting. Our products have always been heavily based on open source and standards - from XML to Apache and beyond. Recently we have found ourselves to be engaged in heavy development on the libsecondlife project as there is only so much that can be done with the stock tools provided by the Second Life platform.

[15:13] otakup0pe Neumann: When teaching, any time a course on networking comes up I always try to show a documentary on the Internet (in the public domain) that was created in the 1970's at MIT. The driving reason behind this decision is to show how, at the heart, the internet has not changed very much since its inception.

[15:14] otakup0pe Neumann: The major change since the internet was created has been the end users. Initially it was academics and scientists, with of course an underlying military theme. Now everyone and their cats (see: catbook app on facebook) is on the internet.

[15:14] Haver Cole: hahaha

[15:15] Adri Saarinen: My cats love Facebook

[15:15] Menno Ophelia: never saw a cube with those killer dance moves

[15:15] Slim Warrior: I like Facebook, I can throw sheep

[15:15] Gigs Taggart: The internet was created to add captions to cats.

[15:15] otakup0pe Neumann: The clincher of the documentary is when they mention the "killer app" of the internet - digital commerce - a feature which western society seemingly cannot live without.

[15:15] JueL Resistance: LOL

[15:15] JueL Resistance: ooooo

[15:15] JueL Resistance: i havn't face'd today

[15:15] JueL Resistance: only twitterd a bit

[15:15] JueL Resistance: lol

[15:15] JueL Resistance: first i twitter, then i face

[15:15] JueL Resistance: th'ts my Kink

[15:15] JueL Resistance: LOL

[15:15] Chel Pixie: when do I *not* twitter?

[15:16] JueL Resistance: lol CHEL

[15:16] Slim Warrior: twitter gets me, I dont even know what I am doing most of the time let alone let anyone else know

[15:16] JueL Resistance: LOL

[15:16] otakup0pe Neumann: I like to think that the evolution of the metaverse will parallel the origins of the internet itself - sans the initial military interest.

[15:16] otakup0pe Neumann: (twitter 4tw)

[15:16] otakup0pe Neumann: We are seeing an initial playing field comprised of mostly commercial applications (There, Multiverse, Entropioa, and of course Second Life) and many that are either moving to open source or already area (opensimulator, open croquet, and once again Second Life).

[15:17] otakup0pe Neumann: The important thing is not opening the source code of these applications as much as opening the protocols used to intercommunicate. Of course, having access to a decent source base can certainly help speed up progress.

[15:18] otakup0pe Neumann: Having open protocols allows different applications to be designed in such a fashion that will allow them to interoperate. The relationship between the Second Life platform and libsecondlife is a perfect example of this.

[15:18] otakup0pe Neumann: The direction opensim is moving is also evidence of this. Currently there are only so many things that can be developed on top of the retail Second Life platform. if you want to customize beyond that, currently you are out of luck.

[15:19] otakup0pe Neumann: This is the void that opensim can help fill. In fact, one of the more interesting projects my company is developing will be done in opensim.

[15:19] JueL Resistance: FKN Love this musiC

[15:19] otakup0pe Neumann: In the future, Linden Lab will have open sourced the server. What exactly that will entail is still mostly up in the air. Given the tasty morsels of information that have appeared in the blog and office hours the open aspects will be confined within the "region" domain, leaving the "agent" domain within the realm of control of Linden Lab.

[15:19] JueL Resistance: im's out of sl and in.....don't mind my delay

[15:19] JueL Resistance: i'm here

[15:19] JueL Resistance: twittering myself

[15:19] JueL Resistance: HAAA

[15:19] Slim Warrior: /hehe

[15:19] otakup0pe Neumann: (heh)

[15:19] otakup0pe Neumann: This will give end users/developers the ability to control everything that happens within a simulator, while preserving the ability to remain connected to the retail grid.

[15:19] Rhiannon Chatnoir: ooo add me to your twitter: RhiannonSL

[15:19] Dually Goalpost: Very cool!

[15:20] otakup0pe Neumann: The option to run on a completely separate grid also exists - something that many companies and organizations will no doubt require. It's the same distinction between an intranet webpage and an internet webpage.

[15:20] otakup0pe Neumann: I look forward to seeing a metaverse based on completely open standards.

[15:20] otakup0pe Neumann: The future should be interesting (and delightfully shiny).

[15:20] Adri Saarinen: Yay shiny!

[15:20] Dually Goalpost likes shiny

[15:20] otakup0pe Neumann: ;)

[15:20] Haver Cole: oo shiny

[15:20] otakup0pe Neumann: Many developers do.

[15:20] Peter Newell: ooooh shiny
[15:20] Rissa Maidstone: Excellent!
[15:21] Slim Warrior likes shiny too
[15:21] Chel Pixie: that's why I named my macbook shiny object
[15:21] Chel Pixie: object*
[15:21] Haver Cole: haha
[15:21] Slim Warrior: lol@Chel
[15:21] Haver Cole: i call mine paperweight
[15:21] *Lucian Halasy: would that mean that individuals could run their own sims on their own hardware?*
[15:21] otakup0pe Neumann: So questions after...
[15:21] otakup0pe Neumann: Lucian, that is correct.
[15:21] Chel Pixie: i couldn't figure it out
[15:21] Adri Saarinen: Yes, we'll do questions after Eddy's talk
[15:21] JueL Resistance: ok read my twitter
[15:21] Peter Newell claps for otak!
[15:21] JueL Resistance: i'm out of my mind right now
[15:21] Adri Saarinen applauds!
[15:21] Slim Warrior: / ooh just imagine, sorting inventory offline:))))
[15:22] Adri Saarinen: Thank you otak!
[15:22] Violet Hazlitt: *applauds*
[15:22] Slim Warrior: /My handbag is a mess
[15:22] Gigs Taggart: woo

Eddy Stryker: Libsecondlife Project

[15:22] Eddy Stryker: if i fall off the stage i blame it on my laptop, otakup0pe convinced me to get a mac and i'm still learning the ropes ;)
[15:23] Adri Saarinen: haha, that bastard. ^^
[15:23] Peter Newell: heh
[15:23] otakup0pe Neumann: ;)
[15:23] Chel Pixie: haha
[15:23] Eddy Stryker: I'm Eddy Stryker in-world, John Hurliman out of world, and lead developer of the libsecondlife project which bridges the two worlds. We're approaching a year and a half of active development and the project has come a long ways from reverse engineering the network protocol of Second Life.
[15:23] Adri Saarinen applauds!
[15:23] Eddy Stryker: We now have an open source client from Linden Labs, a self-documenting protocol, and more open protocols and open source releases coming from Linden Labs soon. It's a very friendly environment to be working on open source code.
[15:23] JueL Resistance: OMG I LOOK LIKE A CARTOON
[15:24] JueL Resistance: WTF
[15:24] Lucian Halasy: cudos to itak to get eddy away from the evil grip of cheap pc hardware :p

[15:24] Eddy Stryker: The libsecondlife project is getting very close to becoming feature complete for the current grid which seemed like an almost impossible task when the project was first starting. The Second Life protocol is vast, complex, and actually many smaller protocols used for different tasks. 2007 has seen a lot of effort from Lindens to make sense of it though, and stabilize the networking layer while making it robust at the same time.

[15:24] Chel Pixie: Jurl

[15:24] Chel Pixie: I hate to tell you this

[15:24] Chel Pixie: nah never mind

[15:24] JueL Resistance is sorry for talking...

[15:24] Eddy Stryker: It's been a bumpy ride for application developers dealing with a constantly changing protocol and API, but a few have stuck around since the beginning and we've seen a surprisingly powerful micro-client named SLeek, grid wide search engines, and many seemingly impossible services and features in Second Life powered by libsecondlife under the hood.

[15:25] Eddy Stryker: The next big step for the project is to attract developers. We want to stabilize our own libsecondlife API as much as possible, provide solid documentation and useful example code, and make things as intuitive as possible for new developers. In a metaverse where you can do anything, it only makes sense to be able to combine that power with the rest of the web.

[15:25] Dually Goalpost: A-men!

[15:26] DMC Zsigmond: Agreed

[15:26] Eddy Stryker: Speaking of combining with the web, another libsecondlife project that has been getting a lot of attention is ajaxLife, a web-based SL client. This is a perfect example of what we envisioned when the project was just starting. That's my favorite part about open source, provide the means and brilliant people will come along and do brilliant things. Sometimes the most important thing a project can do is stay out of the way while people are innovating.

[15:28] Eddy Stryker: As the networking glue between Second Life and the rest of the world, libsecondlife and the developers surrounding it are still working on the perfect balance of providing power while staying out of the way of innovators, much like Second Life strives to do for content creators

[15:29] Jeff McGuire: how are ya'll doing?

[15:29] Eddy Stryker: i think my avatar still has something to say, it is still typing...

[15:29] Adri Saarinen: Avs, minds of their own sometimes ;)

[15:29] otakup0pe Neumann: heh.

[15:30] otakup0pe Neumann: ghost in the machine and all that.

[15:30] Eddy Stryker: ah, there we go. thank you for giving all the open source projects an audience here

[15:30] Adri Saarinen applauds!

[15:30] Peter Newell claps

[15:30] Menno Ophelia: woohoo

[15:31] Violet Hazlitt: *applauds*

[15:31] Discordia Zenovka: *applauds*

[15:31] Adri Saarinen: And now we're happy to take questions during the last 30 minutes of dance time here :D

[15:31] otakup0pe Neumann: ooh afterparty.
[15:31] *Dreamy Rau: Will the transcripts to this be available at developer.amd.com?*
[15:32] JueL Resistance: FAT BOY SLIM
[15:32] Rhiannon Chatnoir: heading out all.. back to RFL for a bit
[15:32] JueL Resistance: WOoOOOOOOOOT
[15:32] Adri Saarinen: Thanks for coming, Rhi!
[15:32] Peter Newell: Thanks for coming Rhi
[15:32] *Dreamy Rau: Where will the transcripts be available?*
[15:33] Slim Warrior: / ooh yes we need FBS and SGF together!
[15:33] Rhiannon Chatnoir: your welcome
[15:33] Doubledown Tandino: it's slimgirlfats bipolar brother
[15:33] Slim Warrior: hahaha
[15:33] Haver Cole: hahaha
[15:33] Haver Cole gets him meds
[15:33] Menno Ophelia: woohoo fatboy slim - warrior
[15:33] Slim Warrior: well he is in london too;))
[15:33] Slim Warrior: ahaha
[15:33] Rhiannon Chatnoir: go see all the RFL builds if you guys havent before they come down in the next day or so
[15:33] Rhiannon Chatnoir: take care all
[15:33] Rhiannon Chatnoir:)))Ass Titties Ass N Titties(((
[15:33] Rissa Maidstone: Thank you all, great program.
[15:33] Discordia Zenovka: *discoballs over the dance floor* :)
[15:33] Slim Warrior: Tc Rhiannon
[15:33] Menno Ophelia: Nite nite
[15:33] Dually Goalpost: Hi Dreamy - I will post a link on the developer.amd.com home page as soon as the trascripts are ready!
[15:33] Dreamy Rau: Great - thanks Dually
[15:34] *Troy McLuhan wonders if anyone here is making automated avatars (NPCs) for SL*
[15:34] Slim Warrior: Hvae agreea night everyone, will see you all soon
[15:34] Dually Goalpost: It will be listed under the "What's New" section :D
[15:34] Chel Pixie: love the lag :*
[15:34] Adri Saarinen: Bots!
[15:34] Dually Goalpost: Thank you Slim!
[15:34] Adri Saarinen: Feel better soon, Slim!
[15:34] Slim Warrior: byeeeeeeeeeeeeeeeeee
[15:34] Chel Pixie: bye Slim
[15:34] Eddy Stryker: Troy: of all different sorts, yes
[15:34] Adri Saarinen: Troy, I know there are some ALICE-based bots
[15:34] Discordia Zenovka: Thanks, Slim!
[15:34] otakup0pe Neumann: troy bots eh
[15:34] Menno Ophelia: bye bye slimmmmm
[15:34] Adri Saarinen: If you're talking about for interaction
[15:35] *Troy McLuhan: Interaction yes*
[15:35] Adri Saarinen: but bots run TONS of things in the background

[15:35] otakup0pe Neumann: **troy there are many projects out there.**

[15:35] otakup0pe Neumann: **if you are looking for answer-bots or somethign - i'm not sure if there are any turnkey solutions yet.**

[15:36] Gigs Taggart: clients ask me a lot about NPC type bots

[15:36] Eddy Stryker: **a lot goes in to making a truly autonomous bot, the individual pieces are still being worked on until someone brings it all together. pathfinding code, chat AI, SL-specific things such as animations**

[15:36] Chel Pixie: LOL

[15:36] Haver Cole: ♥ to everyone

[15:36] Adri Saarinen: *What's the best way for an individual or organization to find libSL solutions?*

[15:36] Gigs Taggart: there's a lot of .. expectation that an NPC style bot should be possible here easily.

[15:36] Haver Cole: great freaking speakers!

[15:36] Lucian Halasy is not a big supporter of bots

[15:36] otakup0pe Neumann: **Adri call Pleiades ;)**

[15:36] Lucian Halasy: sure, there are good things you can do with them but also bad things

[15:36] Adri Saarinen laughs. **"Well, I'd say the same thing about MV."**

[15:36] otakup0pe Neumann: **But seriously take a look at libsecondlife.org. And talk to developers on IRC.**

[15:37] Dually Goalpost: We love AMD users!

[15:37] Adri Saarinen: Lucian, there are good and bad things you can do with any technology

[15:37] Dually Goalpost: haha, me first!

[15:37] DMC Zsigmond: hahahah! lol nice

[15:38] otakup0pe Neumann: The developers are mostly friendly.

[15:38] JueL Resistance: afk a moment

[15:38] Eddy Stryker: **if you aren't working under secrecy, on libsecondlife.org there is a place where you can post what project you are working on and try and recruit developers for contract work. if you are doing the development in-house and just need some help with coding we are almost always around on IRC (EFNet #libsl and #libsl-dev)**

[15:38] Adri Saarinen: I'm not sure it's valuable to rule out an entire type of solution because of potential negative uses-- if we're going to do that, we all might as well unplug from the net before we get virii.

[15:38] Eddy Stryker: and for those top secret projects, Pleiades is a good goto

[15:38] otakup0pe Neumann: <3

[15:39] Dually Goalpost: I want to actually live in SL. Is that possible, yet?

[15:39] Adri Saarinen laughs

[15:39] Doubledown Tandino: i live in SL :O)

[15:39] Doubledown Tandino: no, i really do

[15:39] Adri Saarinen: We'll plug you in, Dually

[15:39] Dually Goalpost: True VR

[15:39] Dually Goalpost: haha

[15:39] Chel Pixie: he really really does

[15:39] Migan Munro: sad...

[15:40] Chel Pixie: hahaha

[15:40] Chel Pixie: <3 DD

[15:40] Gigs Taggart: don't chew on foil.. eek

[15:40] Troy McLuhan: The other day, someone new to SL walked up to me and asked if I'm a bot. They gave me what amounted to a Turing test. "Read that sign over there..."

[15:41] otakup0pe Neumann: haha Troy.

[15:41] Troy McLuhan: They seemed to expect NPCs in SL

[15:41] Adri Saarinen: Troy, that's one of my FAVORITE questions from newbs.

[15:41] Gigs Taggart: I'm actually a very sophisticated chatter bot.

[15:41] otakup0pe Neumann: That ips awesome.

[15:41] Adri Saarinen: It's so meta

[15:41] otakup0pe Neumann: Gigs you can't fool me you are totally a markov chain.

[15:41] Gigs Taggart: I can't take that title :P

[15:41] Violet Hazlitt: I'd go along with it

[15:41] Troy McLuhan: I'm not totally a markov chain in Hawaii

[15:41] Adri Saarinen: I think people expect bots because NPCs are so standard in MMO games

[15:42] Dually Goalpost: Shrek!

[15:42] Violet Hazlitt: "Hello human, I am robot 24601"

[15:42] Adri Saarinen: as ways of getting information, startup cash, etc

[15:42] otakup0pe Neumann: "Can you please stand by the 1-prim sculptie stairs'

[15:42] Doubledown Tandino: yeah, and im robot 420 (smirk, chuckle)

[15:42] Adri Saarinen: I've always wanted to spend an afternoon in a welcome area with a big question mark prim over my head

[15:42] Eddy Stryker: i have to run right now, thanks for having me here though it has been a pleasure

[15:43] Adri Saarinen: Hello AVATAR, I seem to have lost my PLYWOOD CUBE, can you help me find my PLYWOOD CUBE?

[15:43] Dually Goalpost: Thanks very much, Eddy!

[15:43] Peter Newell: Thanks Eddy!

[15:43] Adri Saarinen: Thanks for coming Eddy!

[15:43] Eddy Stryker: take care all

[15:43] otakup0pe Neumann: Take it easy Eddy !

[15:43] otakup0pe Neumann: See you in the future!

[15:43] Violet Hazlitt: do you have cubes in your house? please go stand by the cubes.

[15:43] Troy McLuhan: otaku - Maybe you could tell us an overview of your current EDU focused project?

[15:44] otakup0pe Neumann: hmm ?

[15:44] otakup0pe Neumann: Right now Troy ?

[15:44] Violet Hazlitt: we would tell you but then we'd have to kill you

[15:44] Adri Saarinen laughs

[15:44] otakup0pe Neumann: =X

[15:44] Troy McLuhan: Okay no prob

[15:44] otakup0pe Neumann: Haha.

[15:44] Adri Saarinen: Speaking of which, where's my NDA? :D

[15:44] otakup0pe Neumann: violet could you give a quick rundown on virtual harlem and VAL ?

[15:44] otakup0pe Neumann: Haha Adri. i poked someone this morning.

[15:45] otakup0pe Neumann: it's coming monday.

[15:45] Adri Saarinen: <3

[15:45] Violet Hazlitt: otaku, I thought both were to be kept quiet?

[15:45] otakup0pe Neumann: :s

[15:45] otakup0pe Neumann: yeah i geuss till thepress release goes out.

[15:45] Troy McLuhan: Sorry, don't feel you need to spill any beans on my account

[15:45] Chel Pixie: Tahanks Jeff

[15:45] Chel Pixie: groans

[15:45] Violet Hazlitt: we'll send you the press releases when they come out Troy

[15:45] Chel Pixie: I can't type

[15:46] Troy McLuhan: Feel free to cc: me on the press release - troy.mcluhan@gmail.com

[15:46] Troy McLuhan: Tx

[15:46] Peter Newell: hahahah

[15:46] Adri Saarinen laughs and laughs

[15:47] Peter Newell: WOOOOOOOO

[15:47] Menno Ophelia: haha

[15:47] *Troy McLuhan: So - another topic: Is there a place where people can help found bounties for open source SL developers?*

[15:47] Doubledown Tandino: hahahah Juel :O)

[15:47] Peter Newell: Troy, there are some bounties posted on openmetaverse.org

[15:47] Troy McLuhan looks....

[15:47] Azurei Ash: <http://www.libsecondlife.org/wiki/Bounties> ?

[15:48] Violet Hazlitt: you should all do our bounties first <_<

[15:48] Violet Hazlitt: >_>

[15:48] Gigs Taggart: I hereby put a 10L bounty on a plugin architecture for the client.

[15:48] Chel Pixie: DD you rock

[15:48] Gigs Taggart: 10 ENTIRE LINDEN DOLLARS

[15:48] Dually Goalpost: I'll match that 10 and raise you 20!

[15:48] Adri Saarinen: Gigs, I'll get RIGHT ON THAT

[15:49] Chel Pixie: totally blow me away

[15:49] otakup0pe Neumann: haha adri.

[15:49] Violet Hazlitt: we usually pay bounties in real dollars... at least I think we do?

[15:49] Violet Hazlitt: do we?

[15:49] Adri Saarinen: We usually pay everything in real dollars, easier on our accounting. :D

[15:49] Violet Hazlitt: there's an entire microeconomy in SL that we try to avoid, that's LL's business in a way, part of their "second life imagination" business model

[15:50] Troy McLuhan: There are many orgs in the SciLands community that have a lot of interest in certain capabilities, but no developers - so they want to be able to fund bounties

[15:50] Peter Newell: so if you could front half of that 2 cents, we'd appreciate it

[15:50] otakup0pe Neumann: Depends on the bounty Violet.

[15:50] otakup0pe Neumann: if it's under \$10 USD we can do L\$
[15:50] otakup0pe Neumann: we have a few bounties up liethat
[15:50] otakup0pe Neumann: well. the documentation bounty.
[15:50] Adri Saarinen winces. "Oh. Documentation. That reminds me..."
[15:50] Violet Hazlitt: as long as we don't infringe on LL's clientele, they fully support open sim and open clients
[15:50] otakup0pe Neumann: *nod*
[15:50] otakup0pe Neumann: Opensim is still a gray area.
[15:51] Adri Saarinen: LL is also super supportive of 3rd party developers
[15:51] Chel Pixie: *smoooooocH* DD
[15:51] Adri Saarinen: Like MV
[15:51] Chel Pixie: Gotta poof a while
[15:51] Violet Hazlitt: third party developpers for their own code ;)
[15:51] Peter Newell: Thanks for coming Chel :D
[15:51] Adri Saarinen: Well, we fall under 'content creators' too. :D
[15:51] Adri Saarinen: LL has crowdsourcing down to an /art/
[15:53] otakup0pe Neumann: ok heading out now
[15:53] otakup0pe Neumann: Thank you once again for the invite.
[15:53] Peter Newell: later otak, thanks a ton
[15:53] Adri Saarinen: Thanks so much, otak
[15:53] Violet Hazlitt: later
[15:53] Dually Goalpost: :D
[15:58] Dually Goalpost: Thanks for coming, every0one!
[15:59] Dually Goalpost: Real life beckons - thank you all for making this a great success!
[15:59] Adri Saarinen: Thanks Dually!
[16:04] Dually Goalpost: Bye everyone! Salut and au revoir.
[16:04] Adri Saarinen: Au revoir y adios!
[16:05] Adri Saarinen: Thanks everyone for coming! You can join the AMD Developer Central and Metaversatility groups for updates on future events!
